

TIPS FOR RENEWING YOUR YEARLY COMPLIANCE REQUIREMENTS

1. For the 2017-2018 academic year, your compliance requirements cannot be completed before April 19. Please do not begin completing your requirements before this date. Please note that the flu shot requirement cannot be completed before September 1.
2. All of your compliance requirements (except the flu shot) must be **uploaded to and approved by** Castle Branch by the end of the day on July 1. Your flu shot must be **uploaded to and approved by** Castle Branch by the end of the day on October 25 for the 2017-2018 academic year.
3. To avoid compliance fees, we strongly urge you to upload your requirements in May or early June to allow enough time for Castle Branch approval and enough time for corrections in the case that any of your requirements are rejected by Castle Branch.
4. The School of Nursing Physical Examination Form, Technical Standards Form, TB Skin Test Form, and Flu Shot Form are all located [here](#) under the “Compliance” header for Undergraduate.

PHYSICAL EXAMINATION

- You must use the School of Nursing Physical Examination Form.

TECHNICAL STANDARDS FORM

- The Technical Standards Form replaces the previously used Skills and Abilities for Degree Completion Form.
- Please be sure to submit *both pages* of the Technical Standards Form.

CPR CERTIFICATION

- Most CPR certifications are now valid for two years. Please check your Castle Branch account to determine whether you need to renew your certification this year or next year. Please email UMSN-UndergradCompliance@med.umich.edu if you have questions.
- You must complete one of the following courses. No exceptions will be made.
 - American Heart Association BLS for Healthcare Providers
 - American Red Cross BLS for Healthcare Providers
- You may submit your certification card or your digital certificate. If you submit your certification card, please submit *both sides* of the *signed* card.

TB SKIN TEST

- You are not required to use the School of Nursing TB Skin Test Form. If you submit documentation from your healthcare provider instead, it must include the healthcare provider’s information, your full name, the date that you received the TB test, the date that the results were read, and the results.
- Whatever healthcare facility you get your TB Skin test administered is where you must go back to have it read and complete the test process. A relative or friend who is a nurse cannot complete the read or witness your form, it will be rejected.
- If you need to receive a blood test or chest x-ray, you must upload the actual lab report and clear x-ray.
- Blood tests or chest x-rays are valid for three years.

FLU SHOT

- You are not required to use the School of Nursing Form. If you submit documentation from your healthcare provider instead, it must include the healthcare provider’s information, your full name, the date that you received the flu shot, and what year’s vaccine you received (i.e., the 2017-2018 batch).
