Papers qualifying for this requirement must demonstrate the following characteristics:

<table>
<thead>
<tr>
<th>Present</th>
<th>Absent</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

A. Project is conducted with a student as sole author of the project

B. Evidence that the paper was the product of a research project requirement in a master’s degree program. Course papers are not acceptable.

C. A comprehensive report that includes the following components:

- Specific questions or aims
- A comprehensive, relevant literature review
- Description of methods used to collect data
- Substantive data analysis conducted on data collected by the student for the unique project or data analyzed in conjunction with the advisor’s research project
- A comprehensive discussion of the study findings

D. Quality expected of a graduate student:

- Clarity
- Comprehensiveness
- Logic
- Relevance to nursing

E. The document adheres to an accepted manual of style, such as APA

Additional comments regarding the research project:

______________________________
______________________________

The student’s program planning committee has reviewed the research report completed during the student’s previous graduate work and have verified that the project meets the requirements for the first research project in the doctoral program.

Chairperson, Student’s Program Planning Committee
